DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/14/05 has been entered.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1, 3-16, 24, 26, 30-33, drawn to monitoring system, classified in class 358, subclass 400.
 - II. Claims 17-21, 23, 28, 29, drawn to image forming device, classified in class 710, subclass 15.
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination image forming apparatus has separate utility such as printing a document; invention monitoring system has separate utility such as monitoring, for example, the usage of gas in a gas station or any other system that requires consumables. See MPEP § 806.05(d).

Art Unit: 2625

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this restriction requirement to be complete must include an election of the invention to be examined even though the restriction requirement is traversed (37 CFR 1.143).
